

Unspent Capital

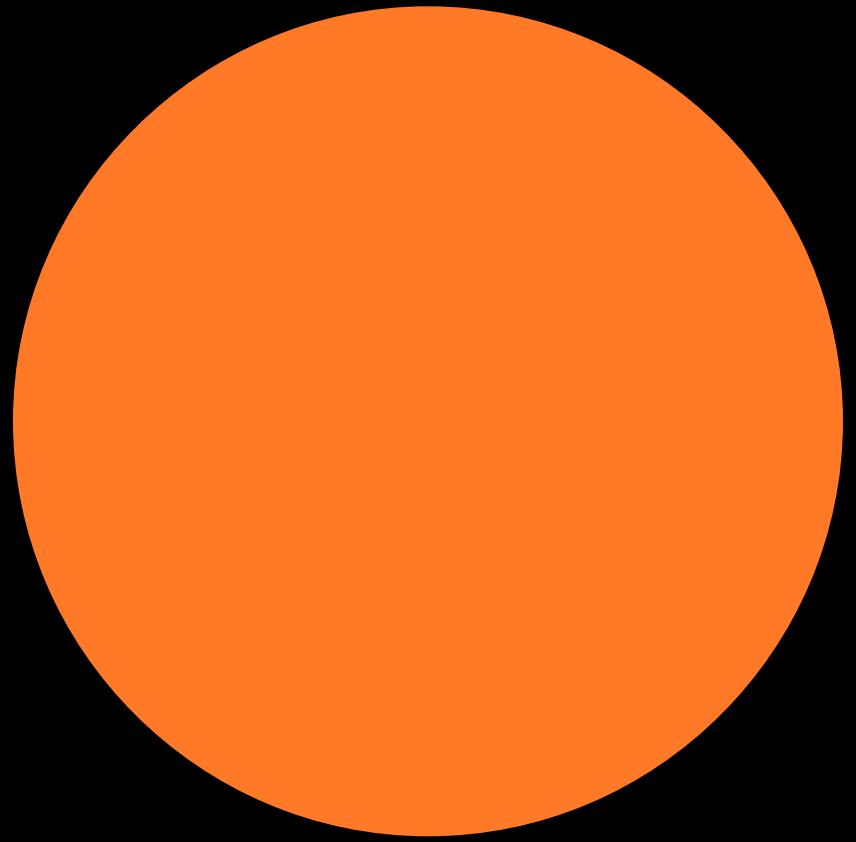

The Philosophy of Saving, Spending, and Shaping the Future with Bitcoin

Presented by James Viggiano

Unspent vs Spent

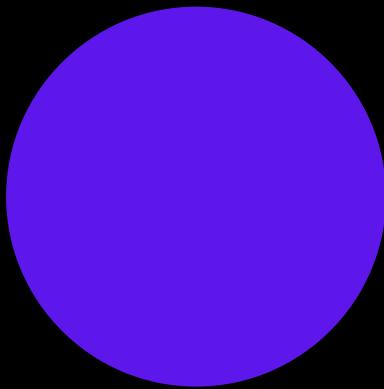

Bitcoin Savings

Fixed supply
Censorship resistant
Global accessibility
Preserves and grows value

Everything Else

Cost of living
Products & Services
Donations
Investments
Shape the world around you

What Makes Bitcoin Unique?

- Fixed supply (can't be diluted)
- Requires Proof of Work (energy)
- Decentralized, borderless
- Free speech money

There's only one Bitcoin

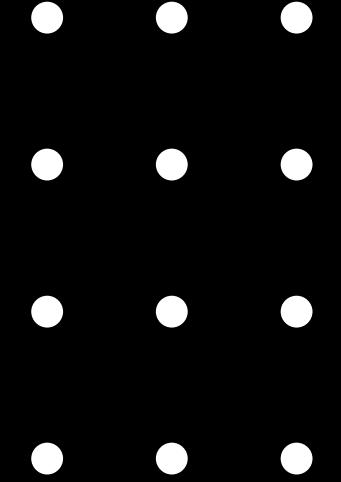

Not 21M, just one.

Earth = Hectares, Square Metres

Bitcoin = BTC, Sats

Your node guarantees this.

Running a node ensures the consensus rules that define bitcoin cannot be changed.

Money in the bank ≠ savings

You're a creditor, not a saver

Lending them money for them to use

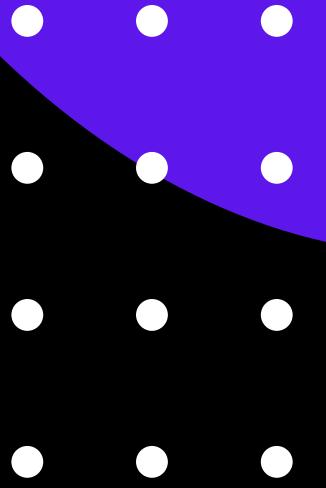

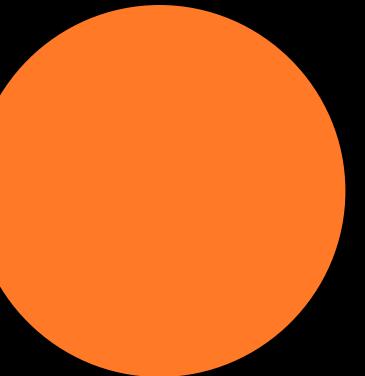

Subject to inflation

If interest doesn't keep up with inflation, it won't grow your wealth, it erodes it.

Cash ≠ evil, it's just a cache.

Fiat is a temporary storage for your money.

Not all cash is equal

Central Bank Paper Cash

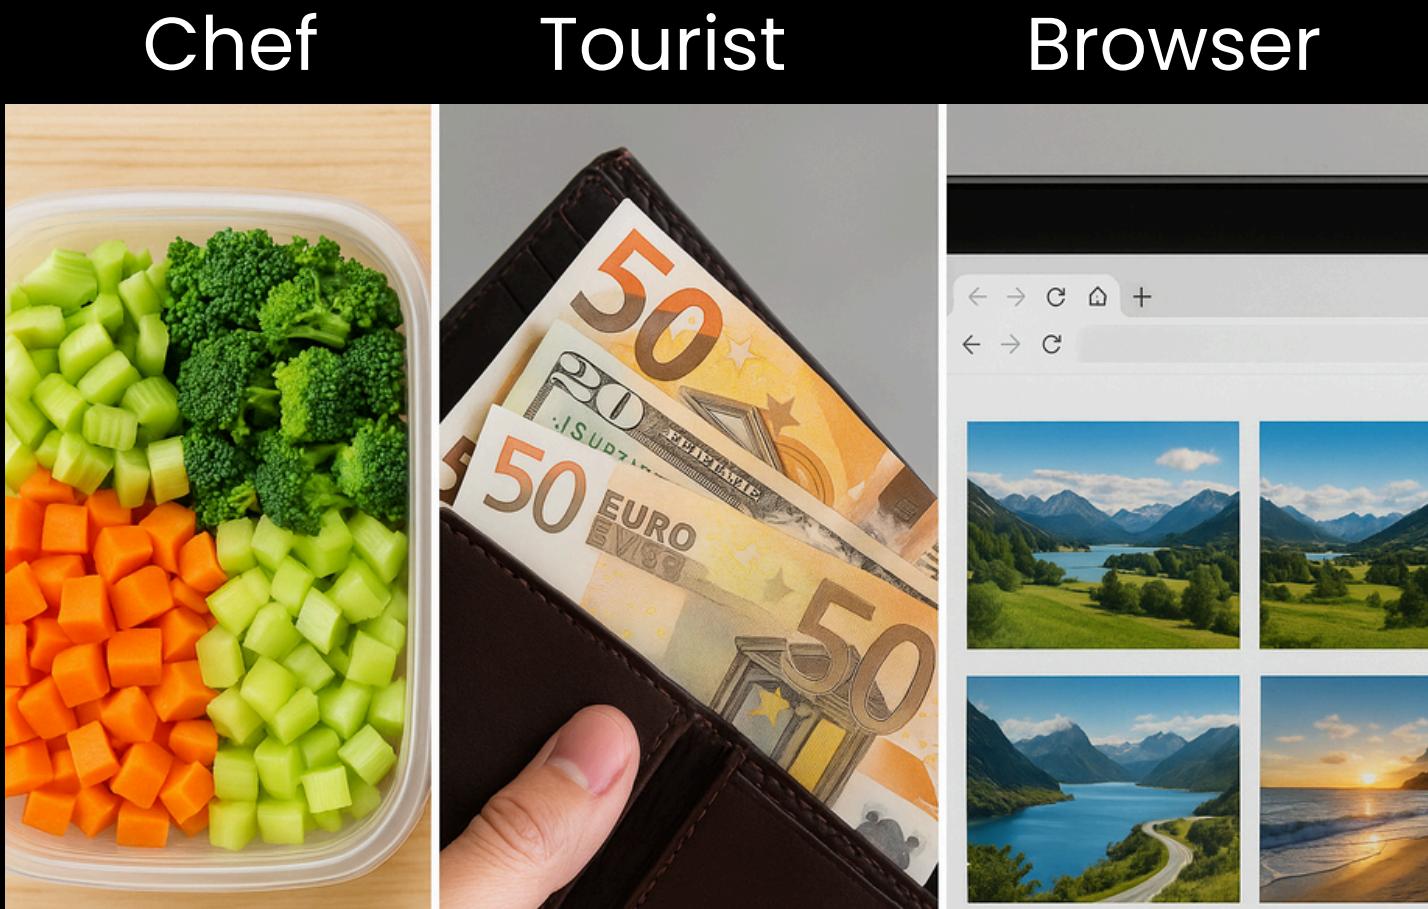

- Physical Self Custody
- Private
- Risk of theft
- Cumbersome

Digital Cash

- Digital Self Custody
- Private
- Fully reserved
- Innovative

Commercial Bank Digital Credits

- Digital Third Party Custody
- Surveilled
- Risk of default
- Convenient

Let's talk about the Bitcoin Journey.

Back Bitcoin

- Skin in the game
- ETF on the stockmarket
- Exposure to Bitcoin's growth and volatility, incentive to pay attention

Stack Sats

- Hands on using Bitcoin
- Lightning wallet service provider (email address for money)
- Earn and spend sats (nostr)

Secure your stack

- Self custody
- Hardware signing device
- Savings account (UTXO's)

The Bitcoin Journey (Part 2)

Secure MultiSig

- World class security
- Threat modelling and mitigation
- Distributed (PSBT)

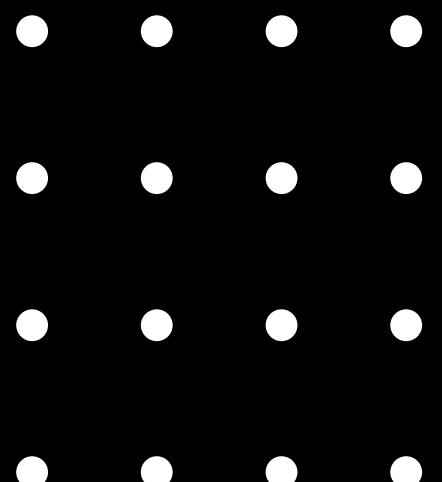

Build on Bitcoin

- Develop on Lightning
- Integrate lightning into your project
- Run a node
- Contribute to projects

Think like an owner

Spending = Shaping

Spend with purpose, Build the world you want to live in
